

Quality, Environment and Safety Policy

Tecnogravura considers that in the development of its activity, the satisfaction of customers, employees and other interested parties, the operability and profitability of the system, as well as concern for the environment, the safety and health of people, fixed and/or mobile installations and equipment, formalized through its Policy, must be continuously ensured, being a strategic objective, which should be continuously improved.

Thus, the Management of Tecnogravura undertakes to provide the necessary resources for the implementation of this Policy, with a view to an effective management of the Organization, based on the following principles:

- To guide the companies' strategies from a perspective of Continuous Improvement, through the periodic review of processes, the Policy and the Objectives and Targets;
- Promote the participation, training and information of all employees, suppliers and stakeholders, in order to progressively strengthen Quality, Environmental Culture and Health and Safety in the organization and motivation of employees;
- Use methodologies and a culture aimed at preventing pollution and reducing the environmental impacts associated with the activity, as well as eliminating hazards and reducing risks to Occupational Safety and Health;
- Foster a culture of occupational safety and health, promoting safe and healthy working conditions for the prevention of work-related injuries and health problems and that is appropriate for the purpose, size and context of the organization, and for the specific nature of its risks and opportunities;
- Continuous improvement of the quality of our products leading to customer satisfaction and obtaining an internal organizational level capable of guaranteeing high productivity and quality at all levels, as well as in environmental and safety and health performance;
- Establish Partnership relationships with Suppliers and Subcontractors, based on a spirit of permanent collaboration, which aim to encourage the supply of better materials and services that are more environmentally friendly and offer greater safety;
- Permanently establish continuous improvement practices, reaching profitability levels that ensure the sustained growth of the company and the effectiveness of the Integrated Management System;
- Apply and enforce the legal and regulatory requirements applicable to the activity, and other requirements that the organization subscribes to, in terms of product, environment, safety and health at work.
- Protect the environment.
